

Education

University of Central Florida

Summer 2018 - Fall 2022 (expected)

- Major: Physics & Computer Science
- Minor: Mathematics

Experience/Projects

UCF Physics Research - Programmer

May 2019 - Jan 2020

- Project that predicts states of matter given the geometry of a compound. I wrote the calculations for locating the atoms in space relative to each other. I also formatted and added documentation to the whole project.

HuskyCore - Owner

June 2017 - April 2020

- Developed and maintained a gaming organization that served game servers for players across the globe to make friends and have fun. During its time, we grew to over 400 members.

Doxsule LLC - CEO

January 2016 - July 2016

- Created a sports apparel clothing brand. In this venture, I learned the backends of business incorporation, and developing a product.

Various Personal Projects (Sources on GitHub)

- I have many personal projects that cover a range of programming languages although mainly Python. My latest project entails checking the S&P 500 points automatically and sending a text if it drops below a certain threshold value to alert me to invest.

Skills

Technical Programming Languages/Tools

- Languages: Python, Javascript, C, SQL, HTML5, CSS3
- Tools: Git version-control, Unix/Linux command line, Visual Studio Code

Soft Skills

- Curiosity, Adaptability, Organization

About

Interests
