# Education

# **University of Central Florida**

Summer 2018 - Fall 2023 (expected)

Major: Physics & Computer Science

Minor: Mathematics

# Experience/Projects

# **UCF Physics Research - Programmer**

May 2019 - Jan 2020

- Project that predicts states of matter given the geometry of a compound.
- I wrote the calculations for locating the atoms in space relative to each other. I also formatted and added documentation to the whole project.

# HuskyCore - Owner

June 2017 - April 2020

- Developed and maintained a gaming organization that served game servers for players across the globe to make friends and have fun.
- During its time, we grew to over 400 members.

#### **Doxsule LLC - CEO**

January 2016 - July 2016

• Created a sports apparel clothing brand. In this venture, I learned the backends of business incorporation, and developing a product.

# Various Personal Projects (Sources on GitHub - GitHub.com/VijayStroup)

- I have many personal projects that cover a range of programming languages although mainly Python.
- My latest project entails an application I made to help people practice the computer science entrance exam at UCF.

### Skills/Awards
