Education

University of Central Florida   **Summer 2018 - Fall 2023 (expected)**

- Major: Physics & Computer Science
- Minor: Mathematics

Experience/Projects

UCF Physics Research - Programmer   **May 2019 - Jan 2020**

- Project that predicts states of matter given the geometry of a compound. I wrote the calculations for locating the atoms in space relative to each other. I also formatted and added documentation to the whole project.

HuskyCore - Owner   **June 2017 - April 2020**

- Developed and maintained a gaming organization that served game servers for players across the globe to make friends and have fun. During its time, we grew to over 400 members.

Doxsule LLC - CEO   **January 2016 - July 2016**

- Created a sports apparel clothing brand. In this venture, I learned the backends of business incorporation, and developing a product.

Various Personal Projects (Sources on GitHub - GitHub.com/VijayStroup)

- I have many personal projects that cover a range of programming languages although mainly Python. My latest project entails a GUI application that monitors a rocket's sensors during the launch phase.

Skills/Awards
